

HOW TO MEASURE/INSTALL pages: The layout & formatting of the PDFs needs to change (see comments in blue at right...) for better legibility. These changes are necessary because the way that these pages are currently formatted on the front-end site is not at all what was shown on the original Mockup. I am willing to accept your version IF you will incorporate the following edits.

[Note: The titles listed here are just fake examples. I will enter the actual real text & titles in Admin]

ROLLER SHADE INSTALLATION GUIDES

← Add more space below Product Category name

LAYOUT & FORMATTING CHANGES

Draper Beaded Chain Clutch FlexShades

 Beaded Chain Clutch FlexShade—Small

 Beaded Chain Clutch FlexShade—Large

 Beaded Chain Clutch FlexShade XD

Draper Beaded Chain Clutch Dual FlexShades

 Beaded Chain Clutch Dual FlexShade

 Beaded Chain Clutch Dual FlexShade XD

Draper Misc. FlexShades

 Beaded Chain Clutch TechMatic

 Clutch Exterior FlexShade

 Crank Exterior FlexShade

 Skylight FlexShade

Topic titles: Ok as formatted on website, no change. Just provide a way to delete Topics.

Content: I will enter this text as "Content" in the text editor found under "Manage How to Install" > Add/Edit > Content. Change the default formatting to **small black font, regular (not bold).**

Left Justified. Keep full text editor so that I can add images, links, etc. as needed.

PDF icon: Move to the left of the PDF title so that all the PDF icons line up vertically

PDF titles: Do not number the PDFs. Standard (not bold) font / grey. Left justified. List will never exceed 4 PDFs per Content.

CELLULAR SHADE INSTALLATION GUIDES

Draper Cellular Shades

 Single Cell Shade

 Double Cell Shade

 Arches & Special Shapes

Hunter Douglas Cellular Shades

 Single Cell Shade

 Double Cell Shade

Leave a blank line of white space between Topics. Use that space to provide a 'Back to Top' link in grey font, right justified.

Leave this space between Product Categories (Roller vs. Cellular, but NOT such a large space between topics within one category. See How to Install page.

In general, match the line spacing as I've shown it here. Notice that the only blank line of white space is between Topics. Within a Topic section, the line spacing is all consistent.
